

The Official Security and Registration Scheme

Stop Machinery Theft Now!

CESAR – The Right Track

0	A CESAR registered machine is 4 times less likely to be stolen**
0	A CESAR registered machine is 6 times more likely to be recovered if stolen***
0	Over 100,000 machines are now registered and protected with the CESAR Scheme
0	Visible and covert markings – a real deterrent.
0	No annual fees – invest just once in marking and registering your equipment for life.
0	Lower insurance premiums up to 20% and reduced excesses – CESAR is approved by all major insurers.

Quick police access to the CESAR database – providing an instant trace on stolen equipment via Datatag's 24/7 secure call centre.

- Recognition by local and national government agencies – easier to get your equipment authorised to work on major construction sites.
- No recovery fees for stolen plant.
- Free parallel registration with the DVLA's Off Road Register (for applicable plant).
- The market leading anti theft system.
- Reduction in stolen plant
 = less down time = more profitable business.
- The first industry-wide official schemebacked by PTAG.
- CESAR is supported by the Home Office & ACPO.

CESAR – The Official Scheme

Plant and Agricultural theft is an estimated £1 million every week headache for the construction & agricultural industry and its insurers.*

For the first time the industry has united behind one official construction and agricultural equipment security and registration scheme. The scheme is CESAR, the premier initiative against equipment theft.

To combat theft and aid recovery CESAR combines:

- State of the art Datatag ID technology
- Overt and covert deterrents
- A low one off cost to protect your machine for life
- A secure and accredited 24/7 database

The triangular CESAR registration plate has become the industry standard with support from local authorities, leading contractors, the farming community, hire companies, the police, insurers and finance companies.

The Construction Equipment Association (CEA) and the Agricultural Engineers Association (AEA) fully support the scheme along with other stakeholders including:

- Leading equipment manufacturers, importers and dealers
- The Home Office
- The police
- Plant hire companies
- Trade associations
- Major insurers

The chosen delivery partner for the official CESAR scheme is Datatag ID Ltd.

News Clipping

Cesar boosts recovery of stolen plant

With enthusiastic backing from the police the Cesar scheme looks like being a success

PLANT SECURIT

It is a year since the Construction Equipment Security and Registration (Cesar) scheme was launched in a bid to cut amount of plant being stolen from UK construction sites.

Developed by Government advisory panel the Plant Theft Action Group, alongside industry body the Construction Equipment Association and anti theft specialist Datatag, the Cesar scheme has already helped boost the detection rates of incidents of plant theft, according to one of its founders

This stolen machine was traded seven times before the Cesar scheme was introduced

and plant hire companies to

The Art of Identification

CESAR systems can include the following state of the art technology:

Hidden Technology

Glass Tag – This transponder is roughly the size of a grain of rice and can be easily installed. It contains a unique code number which is permanently programmed into it's integrated circuit. The number cannot be altered or deleted.

Self-Adhesive Tag – This flexible selfadhesive transponder contains a unique code number which is permanently programmed into its integrated circuit. The number cannot be altered or deleted and is impervious to attack by electric shock & magnetic waves.

Visible Technology

Unique Plant Identification Plate – These tamper-proof plates carry a unique plant identification number ensuring that your property can be tracked and returned in the event of theft. Datatag will take legal action against any copying or unauthorized production of these unique ID plates that contain Datatag's world wide registered trademark.

Microscopic Technology

Datadots® – A superior microdot identification system developed for ease of use. The Datadots can be applied to any surface, thus making it virtually impossible for the criminals to locate and remove them all.

Dot magnified 50 times

Forensic Technology

Datatag DNA – Is a unique chemical DNA solution. Each piece of plant or machinery will be protected with an invisible unique DNA code. Criminals will have to be confident they have removed every molecule of Datatag DNA.

CEA - Who We Are

The Construction Equipment Association (CEA) is the Trade Association that represents the UK Construction Equipment sector.

Our members are established Original Equipment Manufacturers (OEMs), component and accessory suppliers, the trade press and specialist research companies. Company size varies from major multinationals to micro businesses.

The CEA is the trade association for construction equipment manufacturers, component and accessory suppliers and service providers. For further information see www.coneg.org.uk – cea@admin.co.uk – Tel. 020 8253 4502.

AEA - Who We Are

The Agricultural Engineers Association (AEA) was established in 1875 to promote the technical, trade and commercial interests of British manufacturers and suppliers of agricultural machinery.

Since then it has championed the cause of manufacturers of agricultural machinery and more recently outdoor power equipment. Today its members cover a broad spectrum of manufacturers of land based equipment from combine harvesters to secateurs and everything in between. For further information see www.aea.uk.com - ceo@aea.uk.com - Tel: 0845 6448748.

Datatag – Who We Are

Datatag was developed as a powerful theft deterrent to aid retrieval of stolen property. Datatag has achieved this by implementation of "State of the Art" identification technology that has been specifically designed to be virtually impossible to remove or deface, thereby aiding rapid identification and return to rightful keeper. Datatag technology is probably some of the most sophisticated security marking systems available, developed to combat crime and defeat criminals.

Since it's introduction in 1992, Datatag has drastically reduced the rates of stolen property including Motorcycles, Scooters, Plant & Machinery, Cycles and Personal Watercraft etc. Furthermore, the UK Crown Prosecution Service has a 100% successful prosecution record when Datatag has been used as evidence in court. It is endorsed by many Insurers, authorities, organisations and governing bodies and Datatag has developed a unique secure database and has received the highest standard of accreditation in database security. Critically, Datatag provides a service to the Police and its customers, 24 hours a day, 7 days a week.

Datatag Technology

The Datatag scanners are the final ingredient in Datatag's powerful arsenal against theft. These hi-tech scanners are individually programmed to read the Datatag transponders only (otherwise known as 'tags') and play a key role in property identification. As a strategic move, Datatag has invested heavily in this area, arming UK Police Forces with literally thousands of scanners providing them with the ultimate tool to combat thieves.

What are you waiting for? Your equipment to be stolen! **CESAR** it or lose it!

Take action NOW and contact CESAR on +44 08 450 700 440. email enquiries@cesarscheme.org and www.cesarscheme.org or contact your CESAR certified agent.

CESAR is set to become the Industry Standard with many leading manufacturers already protecting their range of equipment with CESAR including:

Construction manufacturers fitting as standard in the UK and Ireland,

Agricultural manufacturers fitting as standard in the UK and Ireland.
